SCHEDULE 12 TO CLAUSE 43.02 DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO12.

BIRREGURRA PREFERRED CHARACTER AREA B (NORTH EAST)

1.0 Design objectives

To encourage sensitively designed and sited responsive medium density residential development within walking distance of Main Street (i.e. 400 metres).

To reduce building bulk and the visual impact on the streetscape and promote flexibility in material use, including lightweight materials such as timber cladding.

To discourage straight driveways and reduce driveway length to increase the permeable areas available for landscaping.

To encourage the retention of trees where possible and the planting of new canopy trees and understorey vegetation to the front, side and rear of dwellings.

2.0 Buildings and works

A permit is not required to:

- Construct, extend or alter one dwelling on a lot that meets the design standards of Table 1 to this schedule.

- Construct, extend or alter an outbuilding (other than a garage or carport) on a lot provided the gross floor area of the outbuilding does not exceed 10 square metres, the maximum building height is not more than 3 metres above ground level and the outbuilding is located no closer to the street frontage than the existing dwelling.

A permit is required to construct a fence that does not meet the design standards of Table 1 to this schedule.

Requirements

The following buildings and works requirements apply to an application to construct a building or construct or carry out works:

- An application to construct more than one dwelling on a lot should demonstrate that the site layout would enable future subdivision in accordance with the subdivision requirements of Clause 3.0 of this schedule.

3.0 Subdivision

A permit to subdivide land must meet the following requirements:

- The minimum lot size is 700 square metres.

The minimum lot size requirement may be varied with a permit where:

- The minimum lot size is reduced by a maximum of 10 percent to allow for specific design constraints.

- The minimum lot size is reduced to not less than 500 square metres to create a lot for an existing dwelling or a dwelling approved under this scheme.

In the event a permit allows the creation of such sized lots, conditions will be imposed to prevent further subdivision of the lots and to ensure that the development is carried out solely in accordance with the endorsed plans unless otherwise approved by the Responsible Authority.

4.0 Signs

None specified.
### Application requirements

The following application requirement applies to an application for a permit under Clause 43.02, in addition to those specified elsewhere in the scheme and must accompany an application, as appropriate, to the satisfaction of the responsible authority:

- A report that demonstrates how the proposal meets the objectives and requirements of this schedule.

### Decision guidelines

The following decision guidelines apply to an application for a permit under Clause 43.02, in addition to those specified in Clause 43.02 and elsewhere in the scheme which must be considered, as appropriate, by the responsible authority:

- Whether the development achieves the design objectives and standards listed in this schedule.
- The interface with adjoining zones.
- Whether the first floor of double storey dwellings is recessed from the ground floor on all sides, or incorporated into the roof space where possible.

### Table 1 to Schedule 12 to Clause 43.02: Design Standards
