C92**Permit Requirement**

A permit is not required to construct a building or construct or carry out works in accordance with an Existing Old Format Approval. In this schedule, "Existing Old Format Approval" has the meaning given to it in Clause 37.05-4.

A permit is not required to construct a building or construct or carry out works if the requirements of Table 1 and Table 2 to this schedule are met.

An application must be accompanied by a site analysis and urban context report which demonstrates how the proposed buildings and works achieves each of the Design Objectives of this schedule, and any local planning policy requirements.

Building height is the vertical distance between the footpath or natural surface level at the centre of the site frontage and the highest point of the building, with the exception of architectural features and building services.

Decision guidelines

Before deciding on an application the responsible authority must consider:

- The orientation and design of a development and whether it will cause significant overshadowing individually or as part of a cumulative effect on the public realm.
- The need to ensure appropriate separation of buildings, particularly tower elements of buildings, to ensure appropriate building bulk, and to avoid the creation of a wall effect.
- Buildings exceeding 40 metres in height must provide an appropriate built form relationship to the street.
- The need to preserve significant vistas.
- The nature of wind effects caused by any new buildings, and the design measures used to address these.
