SCHEDULE 7 TO CLAUSE 43.04 DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO7.

JUMBUNNA ROAD RESIDENTIAL AREA

1.0

Objectives

None specified.

2.0

Requirement before a permit is granted

A permit may be granted before a development plan has been prepared to the satisfaction of the Responsible Authority for the following:

- A minor extension, minor addition or minor modification to an existing development that does not prejudice the future orderly development of the general area affected by the Development Plan Overlay to the satisfaction of the Responsible Authority.
- Buildings and works associated with the Jumbunna Road bus depot provided the buildings and works are contained within the established development footprint or immediate surrounds to the satisfaction of the Responsible Authority.
- The use and development of land for agriculture provided it is minor in nature and does not prejudice the future residential use and development of the land, or the residential amenity of surrounding areas.
- The use, development & subdivision of land by a public authority or utility provider.

3.0

Conditions and requirements for permits

Before deciding on an application to subdivide land, construct buildings, or carry out works, the Responsible Authority must consider, as appropriate:

- Whether the development of the land is occurring in an efficient and orderly manner having regard to essential services, community facilities, open space and roads.
- The potential for future re-subdivision.
- The interface between proposed and existing nearby developments, to reduce the chance of conflicting developments, including in relation to the Bus Depot site.
- The need to minimise access points to Jumbunna Road.
- The design of any proposed buildings to enhance and reinforce the character of the area.
- The timing and staging of the development of the land.
- The consistency of the proposed development with the approved development plan.
- The consistency of the proposed development with the adopted Korumburra Structure Plan, where relevant.

Any other matter, as deemed appropriate by the Responsible Authority, which the development plan should take account of based on the specific character of the land.

The requirement for building envelopes, agreements or covenants to be registered on newly created titles to achieve the lot development restrictions set out in the development plan.

- An assessment against the requirements of Clause 56 of the South Gippsland Planning Scheme.

Development and community infrastructure

Prior to the issuing of a Statement of Compliance (or otherwise agreed to in writing by the Responsible Authority), the landowners may enter into an agreement with the Responsible Authority pursuant to section 173 of the Planning and Environment Act 1987 or other mechanisms approved
by Council. Any such agreement should make provision for contributions to be made by the owners towards the provision of development and community infrastructure on public land (including the provision of land and/or the payment of financial levies) required as a consequence of the subdivision of the land.

**Bus Depot development requirements**

Any planning permit which creates residential lots or approves a sensitive use in the DPO7 area within 50 metres of the Jumbunna Road bus depot site may include a condition to restrict (through an appropriate restriction on title) the use of these lots for dwellings or other sensitive uses until such time as the bus depot is no longer in operation and its existing use rights are expired.

The following requirement applies to the use or development of the Jumbunna Road bus depot site:

Before a sensitive use (e.g. residential use, child care centre, pre-school centre or primary school) commences or before the construction or carrying out of buildings and works in association with a sensitive use commences, either:

- A certificate of environmental audit must be issued for the land in accordance with Part IXD of the Environment Protection Act 1970, or
- An environmental auditor appointed under the Environment Protection Act 1979 must make a statement in accordance with Part IXD of that Act that the environmental conditions of the land are suitable for the sensitive use.

**Fencing requirement**

A planning permit which creates residential lots adjoining land in the Low Density Residential Zone or Lot 1 LP134693 or Lot 3 LP135303 must include a condition requiring fencing along the boundary of these lots. Fencing must be a minimum 1.8m high solid fence to be provided at the developer’s expense and constructed prior to the issue of Statement of Compliance for the subdivision of the land.

**Requirements for development plan**

A development plan must include the following requirements:

The development plan must be prepared to the satisfaction of the Responsible Authority.

The development plan may be approved in stages. Each development plan stage must represent a logical land development unit bounded by roads, natural features or the boundaries of the Development Plan Overlay map area.

The development plan must show / provide:

**Land use and subdivision layout**

- The proposed boundaries of the development area, and provide the strategic justification for those boundaries.
- The overall subdivision of the area, including where possible, the proposed size and density of allotments which provide opportunities for a diverse range of housing types.
- The provision of a sensitive residential interface with adjoining residential land and the school. Lots directly adjoining the Low Density Residential Zone (LDRZ) should have a minimum rear boundary width at the LDRZ boundary of an average of 20m and not less than 18 metres, and avoid (where possible) the creation of more than 2 new lots directly adjoining each established LDRZ lots. Buildings must be setback a minimum of 7m from the zone boundary.
- For lots with a primary frontage to Jumbunna Road and Sommers Crescent provide:
  - Minimum lot frontage of 18m
  - Minimum building front setback of 7m
The provisions of a 2.5m wide reserve (unencumbered by landscaping or development) adjoining the southern side of Jumbunna Road to facilitate future widening of the shared pedestrian footpath to the school.

A street networks that limits the creation of new road access points onto Jumbunna Road and support building frontages with two way surveillance.

The overall pattern of development of the area, including any proposed re-zoning of land and proposed land uses.

**Earthworks and Land Form**

Where steeply sloping land exists on the site, the development plan shall detail how the proposed design responds to the topography and contours of the land and whether significant earthworks are likely to be required for subdivisions to ensure good development design outcomes are achieved. Where land exceeds a slope of 15% a geotechnical report must be prepared by an appropriately qualified person demonstrating the suitability of the land for development.

The report must provide sufficient detail to ensure environmental, access and amenity issues are appropriately addressed. The report should detail whether building envelopes or other controls are likely to be required at the subdivision stage.

**Infrastructure Services**

An integrated stormwater and flood management plan that incorporates water sensitive urban design techniques which provides for the protection of natural systems, integration of stormwater treatment into the landscape, improved water quality, and reduction and mitigation of run-off and peak flows, including consideration of downstream impacts.

A comprehensive Traffic Impact Assessment prepared to the satisfaction of the Responsible Authority, in consultation with the Roads Corporation, that identifies the pattern and location of the major arterial road network of the area including existing roads and the location and details of any required:

- road widening
- signalised/unsignalised intersections
- access points
- pedestrian crossings or safe refuges
- cycle lanes
- bus lanes and stops

The pattern and location of any internal road system based on a safe and practical hierarchy of roads including safe pedestrian and bicycle connections and crossing points in accordance with the background documents *South Gippsland Paths and Trails Strategy 2010 (as amended)* and *South Gippsland Open Space Strategy 2007 (as amended)*. The internal road network must specifically provide for:

- A continuous road / pedestrian link from Prudence Close, across Sommers Crescent and through Lot 4 LP135303 to an exit point onto Jumbunna Road between the school and Lot 1 LP134693.
- The potential for internal road connectivity to the existing dwelling lots that have potential for further subdivision.

In consultation with relevant agencies and authorities, provision of public transport stops where appropriate within easy walking distance to residential dwellings and key destinations. Stops should also be located near active areas where possible.

Identification of costs for infrastructure provision both onsite and offsite.
Open Space and Landscaping

- The location and size of the proposed open spaces that cater for a range of user groups and provide a variety of functions that perform both an active and passive role for recreation, as appropriate.

- Public open spaces designed to provide:
  - The inclusion of pedestrian and cycle paths and play equipment, that encourage active recreational opportunities.
  - Opportunities for visual surveillance to promote safety of users, through encouraging active frontages, using buildings to frame public spaces and locating open spaces within or adjacent to activity centres where possible.

- A landscaping plan, prepared by a suitably qualified person, identifying all proposed landscaping with particular regard to the interface with surrounding residential developments, open spaces, the bus depot, roads and the school. The landscape plan must include canopy tree plantings within both the internal and external road network to soften the visual impact of new development when viewed from within and outside the development area. The landscape plan must provide a high level of detail where new development is to adjoin Jumbunna Road, Sommers Crescent and new Connector Streets especially in areas where new development is inward facing and not addressing the road.

Flora and Fauna

- In consultation with the Department of Environment and Primary Industries, a flora and fauna survey, prepared by a suitably qualified expert which includes but is not limited to species surveys for the Gippsland Giant Earthworm, and measures required to protect the identified species.

- An assessment of any native vegetation to be removed having regard to Victoria’s native vegetation management requirements, including how it is proposed to protect and manage any appropriate native vegetation.

- Regard must be had to the background document West Gippsland Native Vegetation Plan 2003. (as amended).

Cultural Heritage

- A cultural heritage assessment including how cultural heritage values will be managed.

Land Contamination

An investigation by an appropriately qualified person of the potential location and forms of land contamination resulting from previous land uses, as well as measures to address contamination in areas where sensitive land uses are proposed. The investigation must consider, but not be limited to, agricultural chemical use, informal land dumping, industrial & mining activities and former railway use.

Process and Outcomes

The development plan should be prepared with an appropriate level of community participation as determined by the Responsible Authority.

An implementation plan must be submitted as part of the development plan, indicating the proposed staging of the development and timing of infrastructure provision.

The approved development plan may be amended to the satisfaction of the Responsible Authority.

Decision guidelines for development plan

Before deciding on a development plan, the Responsible Authority must be satisfied that the plan has regard to the following information contained within the following background documents:
- Healthy by Design: a planners’ guide to environments for active living®, (National Heart Foundation of Australia - (Victorian Division, 2012) or as amended;
- South Gippsland Path and Trails Strategy 2010 (as amended).
- South Gippsland Open Space Strategy 2007 (as amended).
- Korumburra Structure Plan 2010 (as amended)
