Major hazard facilities

Objective

To minimise the potential for human and property exposure to risk from incidents that may occur at a major hazard facility and to ensure the ongoing viability of major hazard facilities.

Strategies

Ensure major hazard facilities are sited, designed and operated to minimise risk to surrounding communities and the environment.

Consider the risks associated with increasing the intensity of use and development within the threshold distance of an existing major hazard facility.

Apply appropriate threshold distances from sensitive land uses for new major hazard facilities and between major hazard facilities.

Protect registered or licenced major hazard facilities as defined under Regulation 5 of the Occupational Health and Safety Regulations 2017 from encroachment of sensitive land uses.
