Housing supply - Metropolitan Melbourne

Strategies

Manage the supply of new housing to meet population growth and create a sustainable city by developing housing and mixed use development opportunities in locations that are:

- In and around the Central City.
- Urban-renewal precincts and sites.
- Areas for residential growth.
- Areas for greyfield renewal, particularly through opportunities for land consolidation.
- Areas designated as National Employment and Innovation Clusters.
- Metropolitan activity centres and major activity centres.
- Neighbourhood activity centres - especially those with good public transport connections.
- Areas near existing and proposed railway stations that can support transit-oriented development.

Identify areas that offer opportunities for more medium and high density housing near employment and transport in Metropolitan Melbourne.

Facilitate increased housing in established areas to create a city of 20 minute neighbourhoods close to existing services, jobs and public transport.

Provide certainty about the scale of growth by prescribing appropriate height and site coverage provisions for different areas.

Allow for a range of minimal, incremental and high change residential areas that balance the need to protect valued areas with the need to ensure choice and growth in housing.

Create mixed-use neighbourhoods at varying densities that offer more choice in housing.
